

Call to Action: Receive a LEGO MRI Scanner for Use in Healthcare!

This special tool is made available by the LEGO Foundation in collaboration with the Charlie Braveheart Foundation and the PROSA Knowledge Center. It is designed to prepare children for an MRI scan in a playful and accessible way.

Familiarizing Children with MRI Scans and Sounds

The LEGO MRI scanner comes with a QR code that provides access to the sounds of a real MRI scanner. By using this model together with a medical pedagogical care provider or nurse, children can become familiar with the device, its sounds, and the setting. This form of desensitization can help reduce anxiety and ensure a smoother MRI procedure.

Are you interested in using this valuable tool in your department?

Evaluation

We kindly ask you to complete a short evaluation after using the LEGO MRI scanner.

You can do so via the following link/QR code:

<https://www.prosanetwork.com/evaluatie-lego-mri-set/>

Note: The PROSA Knowledge Center and Charlie Braveheart Foundation have no commercial interests in this project. The MRI scanners are provided free of charge by the LEGO Foundation and are not intended for (re)sale.
